

Scale Aerotow – Expressions of Interest

Calling all r/c pilots, do you have a scale sailplane, a capable tug or an interest in flying either?

We are trying to get together everyone in the SEQLD region who would like to be involved in regular gatherings.

A couple of events have been held in the past but we have had issues with tug availability, field conditions and notification of events. There are now a number of very capable tugs and pilots available for our use.

Model sailplanes from 1.5 to 6m+ span can be successfully aerotowed. Tugs are mostly 30 to 100cc.

We also require some venues. Large, flat and smooth fields with uncluttered approaches are best. If your club is interested in hosting a day please let us know.

Scale Soaring Australia <http://www.scalesoaringaustralia.com> is a body already set up to promote R/C Scale Soaring and Aerotowing. Information and notice of events will be available on its web site.
